IDENTIFIERS	New Jersey; *New Jersey High School Proficiency Test

ABSTRACT

This report presents tables summarizing test results statewide for ninth-grade students who took the New Jersey High School Proficiency Test (HSPT) in April, 1987. The HSPT consists of reading, writing, and mathematics sections, and must be passed as one of the requirements for a high school diploma. Data include percent passing, mean score, and score distribution categories. In addition, tables are included that compare student performance for District Factor Group (DFG), 56 Urban Districts, and Regional Curriculum Services Units. Finally, the report contains district-by-district and school-by-school results grouped by DFG. Results for each subject are compared to student performance in 1986 and to the base year for test administration. Results showed that the percent of students passing for 1987 was 91.0% in reading, 77.0% in mathematics, and 85.9% in writing. Statewide, the percentage of grade nine students who passed all three sections of the test was 70.6% compared to 61.5% in 1986. The greatest increase occurred for the percentage of students passing the writing test. In the urban districts, the percent of students who passed each section of the test continued to be lower than all the other districts. (KSA)

1986-87 High School Proficiency Test Results - Grade 9

Executive Summary

The New Jersey High School Proficiency Test (HSPT) consists of three sections--reading, writing, and mathematics--and must be passed as one of the requirements for a high school diploma. If a student does not pass one or more sections, he or she will receive additional instruction and will be retested on that section or sections next spring. The passing scores for the HSPT are: reading - 75, mathematics - 61, writing - 77.

The HSPT was administered on April 7, 8, and 9, 1987 to *81,014 students in grade nine and *32,618 students in grade ten. The population of grade ten students who were tested consisted of students who previously did not pass one or more sections of the test and newly-enrolled tenth-graders who did not attend a New Jersey public school as ninth-graders.

This report includes a series of tables summarizing test results statewide for grade nine for reading, mathematics, and writing. (The performance of grade 10 students is presented in a separate report.) Comparisons of student performance include percent passing, mean score, and score distribution categories. Because the passing scores differ for reading, mathematics, and writing, the score distributions described in this report differ accordingly.

In addition, tables are included that compare student performance for the following categories: District Factor Group (DFG), 56 Urban Districts, and Regional Curriculum Services Units (RCSUs). An explanation of District Factor Groups is included at the end of this report. Finally, the report contains district-by-district and school-by-school results grouped by DFG. The HSPT scores in this report exclude special education students, limited English-speaking students, and students whose answer folders were voided.

Results for each subject are compared to student performance in 1986 and to the base year for test administration. For reading and mathematics, the base year is 1984; for writing, it is 1985. The writing results are compared to 1985 instead of 1984, due to a change in the method for scoring the essay portion of the test from the Holistic Method in 1984 to the Registered Holistic Method used in 1985 and subsequent years. It would be inappropriate to compare test results when different methods of scoring were used.

Reading

Of the 73,378 students tested, 66,765, or 91.0 percent, passed the reading section of the HSPT. This represents an increase of 8.4 percentage points compared to the 1986 percent passing of 82.6. The mean score for 1987 was 88.3, an increase of 3.3 compared to the 1986 mean of 85.0, and an increase of 11.0 compared to the 1984 mean of 77.3.

*This figure represents the total number of students to whom at least one section (reading, mathematics, or writing) of the HSPT was administered.

On the 1987 reading section, 62.2 percent of the students scored between 89-100, compared to 51.9 percent in 1986, and 32.3 in 1984, an increase of 10.3 and 29.9 percentage points, respectively. This increase was combined with a decline in the percent of students scoring 49 or below. In 1984, 7.8 percent of the students scored between 0 and 49; in 1986, that figure dropped to 1.8 percent, and in 1987, to 0.4 percent.

Of the 23,034 students tested in the 56 Urban Districts, 79.6 percent passed the reading section; in 1986, the percent of students who passed was 64.8. While this represents a substantial gain (14.8 percentage points), the percent of students in the 56 Urban Districts who passed the reading section was 16.6 percentage points lower than all other districts and 11.4 percentage points lower than the statewide average. A comparison of mean scores for the 56 Urban Districts indicates an increase of 5.0 from 1986 to 1987 and an increase from the 1984 base year to 1987 of 14.9.

The score distributions show that in the 56 Urban Districts 40.7 percent of the students scored 89 or above in 1987, compared to 29.9 in 1986, an increase of 10.8 percentage points. In 1984, 12.4 percent of the students scored 89 or above; this represents an increase of 28.3 percentage points compared to this year. At the lower end of the scale, 1.0 percent of the students scored 49 or below in 1987, compared to 4.1 in 1986 and to 22.0 in 1984. Compared to 1987, this represents decreases of 3.1 and 21.0 percentage points, respectively.

In all other districts, 72.1 percent scored 89 or above in 1987, compared to 60.6 in 1986, and to 37.7 in 1984. Compared to 1987, this represents increases of 11.5 and 34.4 percentage points, respectively. Between 1984-87, the percent of students who scored 49 or below declined. In 1987, the percent was 0.1; in 1986, it was 0.6, and in 1984, 4.0, for a decrease of 0.5 and 3.9 percentage points, respectively.

Mathematics

The mathematics section of the HSPT was administered to 73,791 students. Of this total, 56,834 or 77.0 percent passed, an increase of 5.2 percentage points compared to the 1986 percent passing of 71.8. The mean score in 1987 was 74.3, an increase of 2.7 compared to the 1986 mean of 71.6, and an increase of 11.7 compared to the 1984 mean of 62.6.

The score distributions show that 43.5 percent of the students tested scored 81 or above, compared to 38.5 in 1986 and 22.5 in 1984, an increase of 5.0 and 21.0 percentage points, respectively. This increase was accompanied by a decline in the percent of students scoring 40 or below. In 1984, 15.0 percent scored between 0 and 40; in 1986 that figure had declined to 6.0; in 1987, it was 4.4, a decrease since 1984 of 10.6 percentage points.

A total of 23,245 students in the 56 Urban Districts were tested in mathematics. The passing rate was 59.0 percent compared to a passing rate in 1986 of 51.9, for an increase of 7.1 percentage points. While this increase was slightly higher than the 5.0 percentage point increase shown by all other districts between 1986 and 1987, the percent of students in the 56 Urban Districts who passed the mathematics section is 26.3 percentage points lower than all other districts and 18.0 percentage points lower than the statewide average. A comparison of mean scores for the 56 Urban Districts indicates an increase of 3.2 from 1986 to 1987, an increase from the 1984 base year to 1987 of 13.3.

The score distributions show that for the 56 Urban Districts, 24.4 percent of the students scored 81 or above in 1987, compared to 20.3 in 1986, an increase of 4.1 percentage points. In 1984, 9.4 percent of students in the 56 Urban Districts scored 81 or above; the 1987 figure of 24.4 percent represents an increase of 15.0 percentage points. The percent of students in the 56 Urban Districts who scored 40 or below was 10.5 in 1987, 13.5 in 1986, and 30.3 in 1984, for a decrease between 1984-87 of 19.8 percentage points.

In all other districts 52.3 percent of the students scored 81 or above in 1987 compared to 46.3 percent in 1986 and 28.3 percent in 1984, an increase of 6.0 and 24.0 percentage points, respectively. At the lower end of the scale, in 1987, 1.7 percent of the students scored 40 or below. In 1986, the percentage was 2.7, and in 1984, 8.2, for a decrease between 1984-87 of 6.5 percentage points.

Writing

Statewide, 73,406 students were tested on the writing section of the HSPT. Of this total 63,065, or 85.9 percent, passed the writing section, an increase of 9.4 percentage points compared to 1986. The mean score in 1987 was 84.7, an increase of 2.5 compared to the 1986 mean of 82.2, and an increase of 4.7 compared to the 1985 mean of 80.0.

The score distributions show that since 1985 there was a continued shift in the test scores toward the upper end of the distribution scale. In 1985, 17.4 percent of the students scored between 89-100; in 1986, the percent was 21.8; and this year it was 30.8, an increase of 13.4 and 9.0 percentage points, respectively. A similar shift was seen also at the lower end of the scale. In 1987, 1.5 percent of the students scored 64 or below. In 1986, the percent was 2.8, and in 1985, 6.1, for a decrease of 1.3 percentage points between 1986-87 and a decrease of 4.6 percentage points between 1985-87.

In the 56 Urban Districts, 71.9 percent of the 23,025 students tested passed the writing section of the HSPT. This represents an increase of 13.6 percentage points compared to the 58.3 percent who passed in 1986. In all other districts, 92.3 percent of the students passed the writing section in 1987. This figure is 20.4 percentage points higher than the passing rate for students in the 56 Urban Districts. The percent of students in the 56 Urban Districts who passed the writing section is 14.0 percentage points lower than the state average. A comparison of mean scores for the 56 Urban Districts indicates an increase of 2.8 from 1986 to 1987 and an increase from the 1985 base year to 1987 of 5.5.

The score distributions show that in the 56 Urban Districts, 16.1 percent of the students scored 89 or above in 1987, compared to 10.1 in 1986 and 7.8 in 1985, an increase of 6.0 and 8.3 percentage points, respectively. The percent of students who scored 64 or below was 3.8 in 1987, 7.0 in 1986, and 14.0 in 1985, representing a decline since 1985 of 10.2 percentage points.

In all other districts, the percent of students who scored 89 or above in 1987 was 37.5; in 1986, it was 26.8; and in 1985, 21.7. In 1987, this represented an increase of 10.7 percentage points compared to 1986, and an increase of 15.8 percentage points compared to 1985. The percent of students who scored 64 or below in 1987 was 0.5; in 1986, it was 1.0; and in 1985, it was 2.6, for a decrease between 1986-87 of 0.5 percentage points, and a decrease between 1985-87 of 2.1 percentage points.

On the essay portion of the writing section, the statewide mean score for 1987 was 8.4, compared to a mean score in 1986 of 7.9 and a mean in 1985 of 7.6, representing increases of 0.5 and 0.8, respectively.

The score distributions indicate that in 1987, 79.9 percent of the students had essay scores between 8 and 12; in 1986, this figure was 67.1 percent, for an increase of 12.8 percentage points. In 1985, 58.0 percent of the students had scores between 8 and 12; compared to 1987, this represents an increase of 21.9 percentage points.

In the 56 Urban Districts, the mean essay score went from 6.8 in 1985 to 7.2 in 1986, and to 7.7 in 1987. This represents an increase of 0.9 during the period 1985-87. The score distributions indicate that in 1987, 66.5 percent of the students had essay scores between 8 and 12; in 1986, the percent was 50.4; and in 1985, it was 39.9. This represents an increase of 16.1 percentage points compared to 1986 and an increase of 26.6 percentage points compared to the 1985 base year.

In all other districts, the 1987 essay mean was 8.7 compared to 8.2 in 1986 and 8.0 in 1985. In 1987, 86.1 percent of the students had essay scores between 8 and 12; in 1986, that figure was 74.5 percent; and in 1985, it was 66.0 percent. This represents an increase between 1986-1987 of 11.6 percentage points and an increase between 1985-1987 of 20.1 percentage points.

On the multiple-choice portion of the writing section, the mean score this year was 84.1, compared to 81.9 in 1986 and 78.0 in 1985, an increase of 2.2 and 6.1, respectively. The score distributions indicate that in 1987, 68.7 percent of the students scored 81 or above, while in 1986, this figure was 59.9, an increase of 8.8 percentage points. In 1985, 48.0 percent of the students scored 81 or above; compared to 1987, this was an increase of 20.7 percentage points.

In the 56 Urban Districts, the mean score in 1987 was 78.6, compared to 75.7 in 1986 and 71.3 in 1985, an increase of 2.9 and 7.3, respectively. The score distributions show that in 1987, 49.2 percent of the students scored 81 or above; in 1986, it was 40.1 percent; in 1985, 30.0 percent. This represents an increase of 9.1 percentage points between 1986-87 and 19.2 percentage points between 1985-87.

In all other districts, the mean score increased from 80.9 in 1985 to 84.5 in 1986, and to 86.6 in 1987. This represents an increase from 1986-87 of 2.1 and an increase from 1985-87 of 5.7. The percent of students scoring 81 or above was 77.6 percent in 1987, 68.5 percent in 1986, and 56.0 percent in 1985. This represents an increase between 1986-87 of 9.1 percentage points and an increase between 1985-87 of 21.6 percentage points.

Summary

The percent passing for 1987 was 91.0 percent in reading, 77.0 percent in mathematics, and 85.9 percent in writing. The number of students who did not pass each section of the test is 6,613 in reading, 16,957 in mathematics, and 10,341 in writing. Statewide, the number of grade nine students who passed all three sections of the test this year was 52,460 (70.6 percent); in 1986, the number was 49,461 (61.5 percent). Compared to last year, this represents an increase of 9.1 percentage points.

In addition to increases in the percent of students who passed all three sections of the test, this year saw increases in the percent of students who passed each section compared to last year. The greatest increase was in writing. Compared to last year, there was an increase of 9.4 percentage points in the percent of students who passed the writing section. Second to writing was the increase in reading--an increase of 8.4 percentage points compared to last year. The 5.2 percentage point increase in mathematics was not as high as for reading and writing. In the 56 Urban Districts, the percent of students who passed each section of the test continued to be lower than all other districts; however, their rate of improvement increased in each of the last two years.

In addition to increases in percent of students who passed each section of the test, there continued to be a shift in distribution of test scores from the lower end to the higher end of the scale. This was indicated for each section of the test in the 56 Urban Districts and for all other districts. Accompanying this increase at the higher end of the scale, was a decline in the percent of students who scored in the lowest categories of distribution and an increase in the percent of non-passing students who scored in the category just below the passing score.

COMMUNITY TYPES AND DISTRICT FACTOR GROUPS

A. Community Types

1 -- Urban Center (UC): densely populated with extensive development.
2 -- Urban-Suburban (US): near an urban center but not as highly developed, with larger residential areas.
4 -- Suburban (S): predominantly single-family residential within a short distance of an urban area.
5 -- Suburban-Rural (SR): rapidly developing area, but still large tracts of open land available for development.
6 -- Rural (R): scattered small communities and isolated single-family dwellings.
7 -- Rural Center (RC): high-density core area with surrounding rural municipalities.
8 -- Rural Center Rural (RCR): small developed core area surrounded by rural areas.
9 -- Vocational (V): primary emphasis on vocational training under a separate educational jurisdiction.
0 -- Regional District (RD): an educational jurisdiction established to service several surrounding communities.

B. District Factor Groups

The District Factor Group (DFG) is an indicator of the socioeconomic status of citizens in each district and has been useful for the comparative reporting of test results from the statewide testing programs. The measure was first developed in 1974 using demographic variables from the 1970 United States Census. Since that time, however, the socioeconomic status of some districts may have changed considerably. Therefore, an updating of the DFG designations was needed.

The DFG's have been updated using seven socioeconomic variables from the 1980 United States Census. These are:

(1) Educational level

1 = elementary (0-8 years) through high school (1-3 years)
2 = high school (4 years)
3 = college (1-3 years)
4 = college (4 years)
5 = college (5+ years)

(2) Occupational status

1 = laborers
2 = service workers (except private and protective)
3 = farm workers

4 = operatives and kindred workers
5 = protective service workers
6 = sales workers
7 = clerical and kindred workers
8 = craftsmen, foremen, and kindred workers
9 = quasi-professionals
10 = managers, officials, and proprietors
11 = old and new professionals

(3) Density

number of persons per household

(4) Urbanization

percent of district considered urban

(5) Income

median family income

(6) Unemployment

percent of those in the work force who received some unemployment compensation in 1979

(7) Poverty

percent of residents below the poverty level in 1979

The variables were combined using a statistical technique called principal component analysis, which resulted in a single measure of socioeconomic status for each district. Districts were then ranked according to their value on this measure and divided into 10 equally-sized groups. Hence, DFGs range from A (lowest socioeconomic districts) to J (highest socioeconomic districts). In addition, special service districts are not included and all vocational districts are designated DFG "V".
